Ramblings From Your Editor

My mother turned 75 last month. She is not happy about that, so don't tell her I told a few hundred people just now. We had a family reunion as her birthday party. My Uncle Henry was there and he had saved a mailing that offered *The New World Book of Homs*. Chuckling all the while, we looked over the mailing, that was slanted towards a white, Anglo-Saxon audience, not a Chinese one.

First, I was greeted with a picture postcard of a Caucasian, mostly blond, tidy, perfect nuclear family that resembles no family I know. I am inferring, based on familiarity, that I am to readily identify with them. It didn't happen.

Next was the letter, in the upper right hand corner was the Hom family crest. Imagine that! We were so happy to see that a crest exists for our noble Chinese village- stock.

I was mightily impressed that the letter was addressed to "Dear Henry," not "Mr. Hom," but the overly familiar first name only. In Catholic school, I would have been banished from class for such a trespass.

The letter claims that *The New World Book of Homs* has Homs "that date back to 1661." It further states that the book provides what "might be the oldest facts about Homs in North America..." as well as, "2 rare Hom immigration records of Homs who arrived between the 17th and early 20th centuries (*Two records in a span of 300 years? Wow!*), each having a story to tell: like Jan, who arrived in New York in 1661....These

hard-to-find Hom immigrant records may help you determine if Jan is the connection to your old world roots."

By now, Uncle Henry and I are so excited, we are hoping we can claim Jan as ours.

Also, there is the promise that "this one-of-a-kind Hom book reveals reasons why European immigrants left the Old World...dramatically told in firsthand accounts from letters, journals and diaries. Plus,...amaze yourself with historic Hom facts from actual immigration records. (*Remember, the two of them?*) Discover how family names originated and what the distinguished Hom name means. See how family crests were developed and find a Hom Coat of Arms, granted to an individual Hom centuries ago, that is translated into everyday language." *What does the latter part mean?*

Big claims for a general, one-size-fits-all genealogy book. Sure, in the small print there is the disclaimer that this is not intended for providing proof for family trees, but who really reads the small print. Just a reminder to those beginning in genealogical research, if it sounds too good to be true, it most likely is.

This book is more likely a compilation of phone book listings from around the world. You can get the same information for free from the Internet.

Happy hunting, and keep your guard up. Better yet, protect yourself with your family crest shield. Everybody has one, haven't they?

What Is Really Under That Kilt?

The True Story of the Origins of the Kilt and Tartan Patterns
By George Robert Kimmons

National Tartan Day, commemorated on April 7, came to mind at the supermarket the other day. The gentleman in front of me in the line was in full Scottish splendor—Campbell tartan kilt, sporran, dagger, cape, and highland bonnet. Doubtless he dons his fine costume each April to celebrate Congress-ordained Tartan Day. I hadn't the heart to tell him that Thomas Rawlinson, an English Quaker from Lancashire, invented the kilt in the 1730s.

Rawlinson was a Lancashire ironmaster, who built a furnace on the forested lands of the MacDonells of Glengarry near Inverness in 1727. He acquired an interest in highland costume in the process. For generations, highlanders had worn a long "Irish" shirt (their historical roots were in Ireland), a tunic, and sometimes a plaid garment. During the seventeenth century, the Irish shirt fell into disuse. Many highlanders now wore a homemade close-fitting, brown coat with a belt, which extended to mid-leg. Scottish soldiers fighting in civil wars donned a brown or plaid robe which covered the whole body and was fastened with a belt, so that the lower part formed a kind of skirt. This *breacan*, or "belted plaid", which was often folded to form "a short petticoat that reached half way down the thigh." This "quelt" was worn "so very short that in a windy day, going up a hill, or stooping, the indecency of it is plainly discovered."

The highland dress was convenient and cheap, ideal for the traveler skipping "over the rocks and bogs, who lies all night in the hills." Rawlinson modified the *breacan* to make it convenient for his workmen. The result was the philibeg, or small kilt, created by separating the skirt

from the plaid and converting it into a separate garment with pre-sewn plaits. Rawlinson himself immediately donned the kilt. So did Chief Ian MacDonell of Glengarry himself. Obediently, his followers did the same. The kilt soon caught on all over the highlands.

After Bonnie Prince Charlie's rebellion of 1745, Parliament banned the wearing of highland costume. By 1780, Highland dress and many other customs were extinct. But the suppression of Highland life left a quaint memory of primitive romanticism in its train. By the end of the eighteenth century, prosperous, Anglicized Scottish peers, lawyers and merchants had adopted the kilt as glamorous public wear. After all, they would never have to caper over rocks and hillsides. By then, English statesman William Pitt the Elder formed Highland regiments of the British Army, which were exempted from the ban on highland dress. They adopted the kilt as a practical, convenient uniform. As the regiments proliferated, so did distinctive regimental tartans. The fashion caught on. By the end of the eighteenth century, both civilians and soldiers were identifying tartans with Scottish clans.

Englishmen may have invented the kilt, then saved it from extinction, but it was the Scots who invented its pedigree. By the Napoleonic Wars, officers of Highland regiments were convinced the kilt was of hoary antiquity. In 1804, the War Office proposed changing Highland uniforms from kilts to trouser-like trews. Colonel Cameron of the 79th Regiment expressed the opinion of many when he opposed the degrading notion of stopping "the free circulation of pure wholesome air [under the kilt] which so peculiarly

fitted the Highlander for *activity*." So the kilt remained and the kilted Highlanders captured the imagination of Europe at the Battle of Waterloo in 1815.

A fashion for kilts and tartans spread throughout Europe in the years that followed. In 1822, Colonel David Stewart of the 42nd Highlanders declared that tartans had always been woven in "distinctive patterns of the different clans, tribes, families, and districts." Resourceful manufacturers of woven cloth, like William Wilson and Son of Bannockburn, entered into an alliance with the Highland Society to prepare a "Key Pattern Book" identifying tartans with specific clans. A whole generation of spurious histories propagated these mythical identifications. Not that historical accuracy had anything to do with commercial reality. Chief Cluny Macpherson received the "Macpherson" tartan straight from the factory. They omitted to tell him the tartan had previously been labeled no. 155, then "Kidd," after a Mr. Kidd of the West Indies, who clothed his slaves in the cloth. The historian Lord Macaulay, himself a Highlander, called the new fashion for clans and tartans a "hallucination."

In time, the spurious clan tartans devised by a number of entrepreneurs and fantasists gave a strange and uncritical historical imprimatur to the invention of an English industrialist. Today's tribal enthusiasm for clan tartans and kilts enriches dozens of adept manufacturers, who clothe Scots and supposed Scots from Cape Town through Taiwan to the Highlands. And, in the best American fashion, we commemorate their enterprise with National Tartan Day.

Early Day Matches

Submitted by Bea McGrath

Matches were very scarce during the 1850s. Flint and steel were used almost exclusively. In order to have easy access to fire at any time, a pit was dug near the house and a fire built inside. After the fire burned down, the coals were covered with ashes. When a fire had to be built, one was not dependent upon the flint as long as any coals remained in the fire pit. It was not unusual in those days for a person to ride to his nearest neighbor to borrow a coal with which to start a fire. Sometimes coals were placed in little brazeros or calderas and put in the middle of the room when it was cold. Ashes were used for making soap, along with the fat rendered from cattle.

This was the way of life in the Santa Barbara area, as well as in most rural areas of the United States.

Corn Bread Casserole

By Lorraine Hillebrand

By demand, the recipe to the popular dish at the January seminar.

1 cup sliced onion--sautéed
1/2 cup cheddar cheese--grated
1 small pkg. Jiffy Corn Muffin Mix
1 cup cream-style corn
1 egg--slightly whipped
2 tbsp. milk
1/2 cup sour cream

Combine the following: Jiffy mix, egg, corn, & milk. Put in 8"x8" pan. Top with sautéed onions, then spread sour cream over all. Lastly, top with grated cheese.

Bake at 375°, 25-30 minutes. Test the center for doneness. Serves 4-6, depending if this is a main or side dish.

Netting Your Ancestors: Genealogical Research on the Internet.

By Cyndi Howells. 1997. 8 1/2 x 11 in., Paper, 182 pp., Indexed. \$19.95, plus \$3.50 shipping. Order from Genealogical Publishing Co., 1001 N. Calvert St., Baltimore, MD 21202. Phone 1-800-296-6687.

Cyndi Howells has written a book for the complete computer novice. Also the creator of a popular genealogy site on the Internet, she explains exactly what you need and where to get it in very understandable terms. The book is printed in large, easy-to-read type.

This book begins with a list of what you can and cannot expect from the Internet (e.g., don't expect your family tree). Major sections of the book are: how to connect to the Internet, using e-mail, do's and don'ts of mailing lists, and how to search the Internet.

This book, also, contains lots of nice lists and a good glossary. For example there are 10 pages of different mailing lists that you can subscribe to, and a brief summary of the topics covered by each. Other examples: lists of web addresses for vendors, libraries and archives, genealogical organizations, research guides, searchable databases and surname lists, free software to download. You can learn to be an Internet sophisticate by using "emoticons" (symbols for emotions) like :) for a smile, or O for a hug and use e-mail acronyms like AFAIK (as far as I know) and TTYL (talk to you later). If you have not done a lot of Internet research you will learn a lot and feel more comfortable trying the various functions. In fact, everyone can learn something from this book.

Land and Property Research in the United States.

By E. Wade Hone. 1997. Size 8 1/2 x 11 in., Hardbound, 517 pp., Indexed. \$49.95, plus \$5.00 shipping costs. Order from Ancestry, P.O. Box 990, Orem, UT 84059. Phone 1-800-ANCESTRY.

One of the most frequently overlooked areas of genealogical research is land records. The author of this comprehensive book on land and property research presents extensive and useful background material, as well as information on basic strategies and the "how to's" of doing the research.

Section 1 focuses on pre-U.S. possessions—Spanish, British, French and Mexican—and their land ownership in contrast to Section 4, which delves into the more current system of individual ownership and land transfer. Sections 2 and 3 expand on the origins of land as they have shifted from federal and state government to private hands. The final section discusses the acquisition and dispersal of Native American land records. All chapters within each section have an extensive list of materials for further reference.

The two appendices (A and B) include a detailed tract book guide to federal land states and a series of land office bounty maps for all federal land states.

This well organized, comprehensive genealogical tool is one of the "best" for individuals wishing to explore land and property records in the United States.

The Original Scots Colonists of Early America Supplement: 1607-1707.

By David Dobson. 1998. Hardbound, 204 pp., \$22.50, plus \$3.50 postage and handling. Order from Genealogical Publishing Co., Inc., 1001 N. Calvert St., Baltimore, MD 21202

This Supplement contains data that improves on some of the information found in the author's *Original Scots Colonists of Early America. 1612-1783* for the time period 1607-1707; it also contains completely new information taken from recent research. The original publication, published by Genealogical Publishing Company in 1989, was based entirely on source material located in the United Kingdom, while this volume contains primary and secondary material from both U.K. and U.S. sources.

The book is in four parts: an introduction, archives and publications, an alphabetical listing of emigrant names, and the appendices. In the three-page introduction, the author gives some history of Scots immigration to North America in the seventeenth century. Following the introduction there are six pages listing archives and publications where source material for this volume was found. The main part of the book contains 183 pages of names of emigrants from Scotland to North America between 1607-1707; each entry is accompanied by the date of the event, brief informational statements, and the archive or publication where the information was found. In the eleven-page appendices, the author has included copies of two documents used to encourage emigration from Scotland to North America. Also, in the appendices, there is a list of Nova Scotian baronets granted land for the purpose of development; however, the project was abandoned because King Charles I handed the area over to the French.

Ships from Scotland to America. 1628-1828.

By David Dobson. 1998. Hardbound, 127 pp. Genealogical Publishing Co., Inc., 1001 N. Calvert St., Baltimore, MD 21202.

This book presents a compilation of the names of vessels that carried immigrants from Scotland to North America in the period 1628 to 1828. Included with the vessel name, if known, are the vessel tonnage, the name of the master, departure port, destination, departure and arrival dates, and the numbers of passengers transported.

A brief history of the emigration of Scots to North America during this time period is given in the Introduction. The author states that the "... book is based on research into contemporary newspapers, government records, and a small number of published sources, on both sides of the Atlantic." Each entry is referenced with the source and date. While the reviewer did not count the number of vessels listed, he has estimated this number at about 1600. If the researcher has found the name of the ship on which his ancestor sailed, this book could be of value in obtaining data concerning the ship and its sailing.

PAF Help-Guide

By Diane M. Anderson. 1997. Paper, 89 pp. \$14.95, add \$4.50 for shipping costs. Order from Heritage Quest, P.O. Box 329, Bountiful, UT 84011-0328.

Diane Anderson is an experienced PAF instructor and writer of workbooks. The current publication is a step-by-step tutorial for classroom or self use with Personal Ancestral File Version 3 and higher. (Version 3 is for PC only. The latest Macintosh version is 2.3.1 as of March 1998.) She takes the

reader through the creation of a new Family Records File. In detail, she describes the data entry and editing features, how to print reports, how to generate focus lists, and how to import and export records.

There are exercises to complete at the end of each chapter before advancing to the next chapter. Her instructions refer the student regularly to sections of the PAF 3.0 User's Guide. The book includes an appendix, a full index, an index of the exercises, and addresses for support services.

Guidelines on Submissions

Material for this quarterly publication is solicited from members and non-members of the Society.

Articles and information submitted will be scanned and converted into raw text for typesetting. Therefore, all submissions must be typed and printed clearly. Dot matrix print-outs in very small print do not convert well, so please try to set your letter size at 11 pt. or larger.

Queries: Please have them be succinct, and easy to understand. Give full names, dates and locations when possible. Queries should be typed, and accompanied by a cover letter with your name, address and phone number.

Submission topics:

Local records: Church records (birth, baptisms, death, marriage records); Cemetery records; School records; Business records; Civil and Court records; Clubs and Lodge records; Deeds; Wills and Estate records.

Family research: Ahnentafels, narratives or lineages of a family (sources would be appreciated).

General information pertaining to genealogy: "How To" articles; historical essays; anything that may make one laugh, etc.

Warning: The editorial staff (of one at this moment) reserves the right to copy-edit any submission.

Santa Barbara County

One of California's 27 original counties. While the county was actually created in 1850, the written history of the area dates back to 1542. In that year Juan Cabrillo discovered the Santa Barbara Channel and later, according to legend, crossed to San Miguel Island where he died and was buried. A second Spanish explorer, Sebastian Vizcaino, entered the channel on the Feast Day of Saint Barbara in 1602, and named the area accordingly. Fr. Fermin Francisco de Lasuen founded the Santa Barbara mission in 1786. Santa Barbara Royal Presidio, established April 21, 1782, by Fr. Junipero Serra, was the last of four royal presidios in Alta California: Santa Barbara, San Diego, Monterey, and San Francisco. Santa Barbara had all three Spanish forms of administration - Presidio representing the military, Pueblo the civil, and Mission the religious. In 1873, Ventura County was established from the southern portion of the original Santa Barbara area.
